INSERTIONS BY CLINICAL SPECIALTY

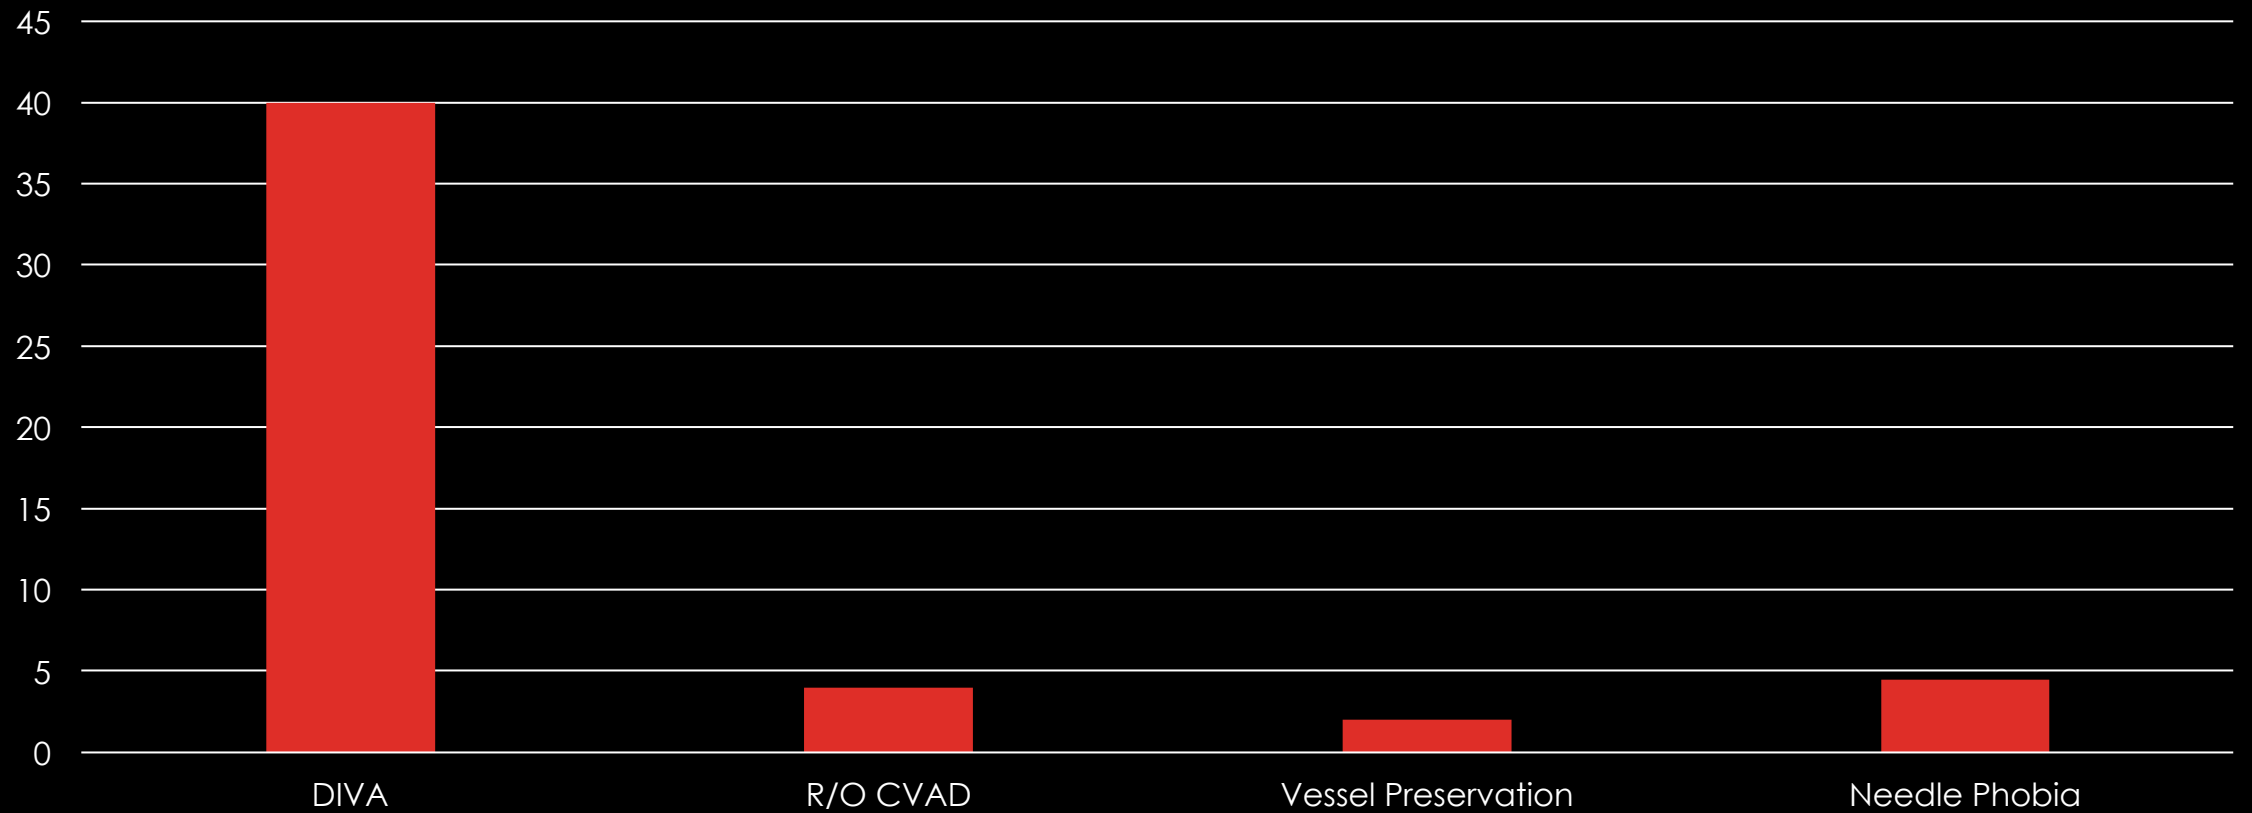

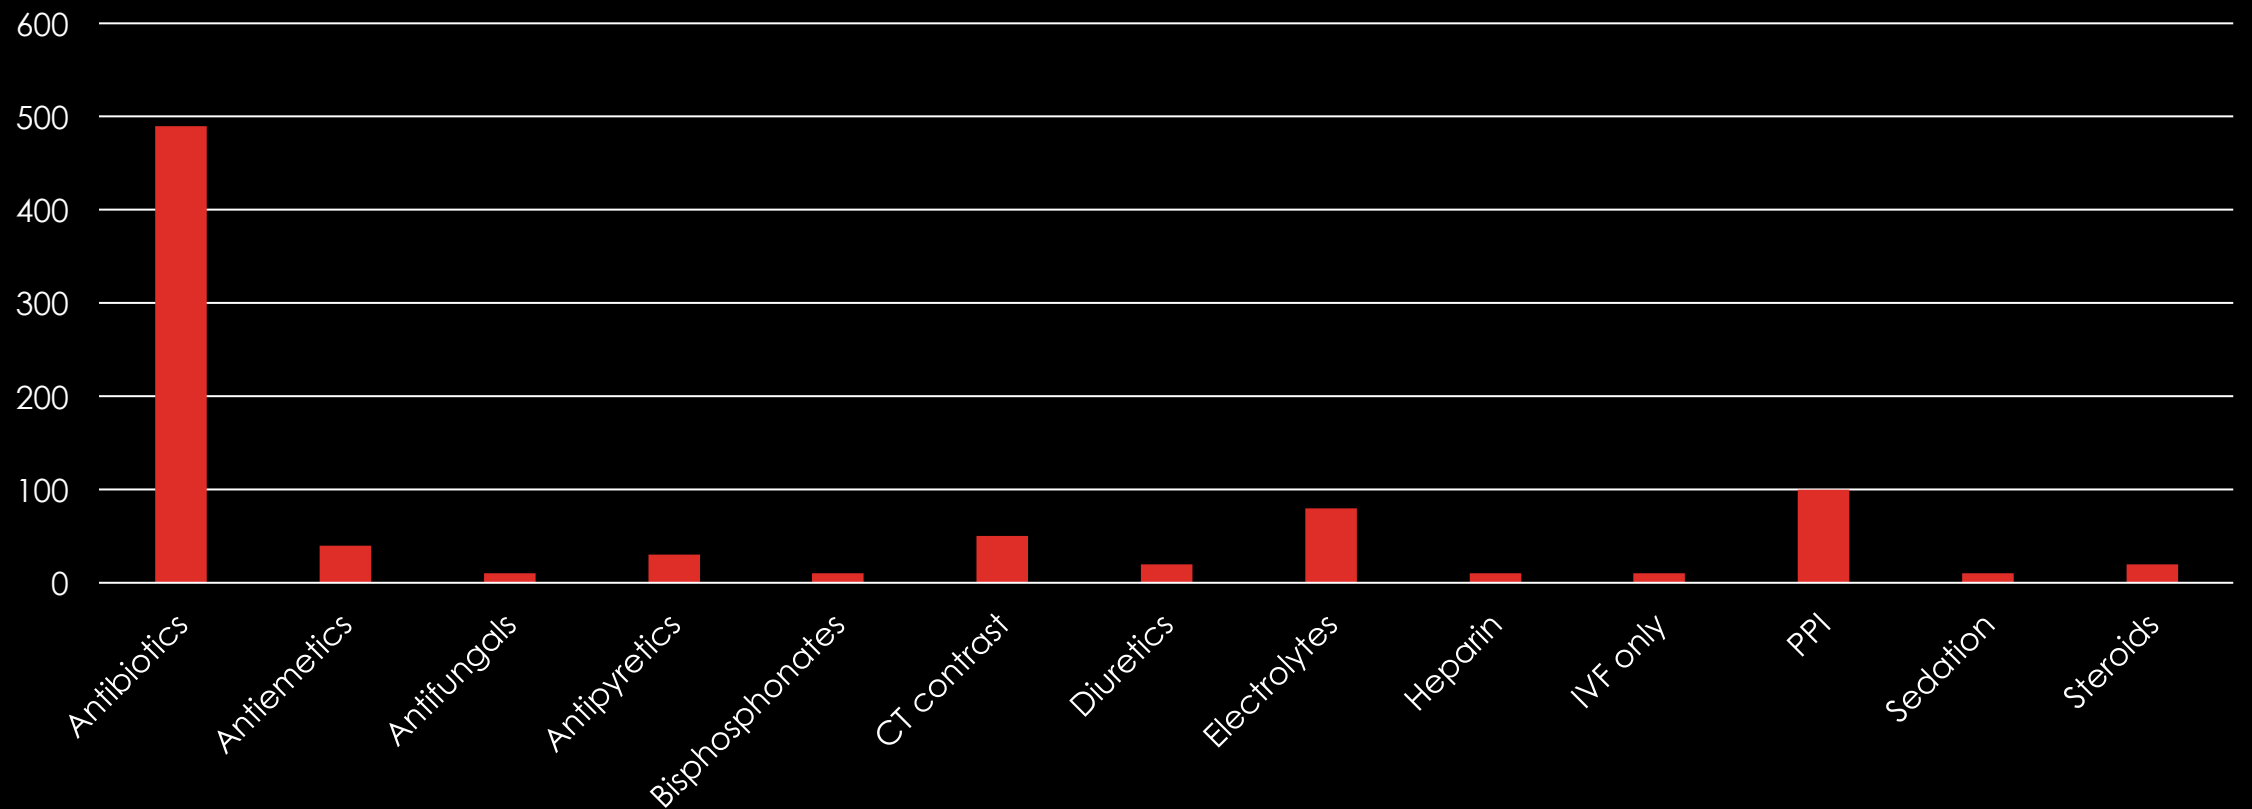

PREVIOUS CANNULATIONS

- Data only reflects successful attempts
- 4 patients presented with a CVAD
- 2 patients had >1 Powerglide during admission

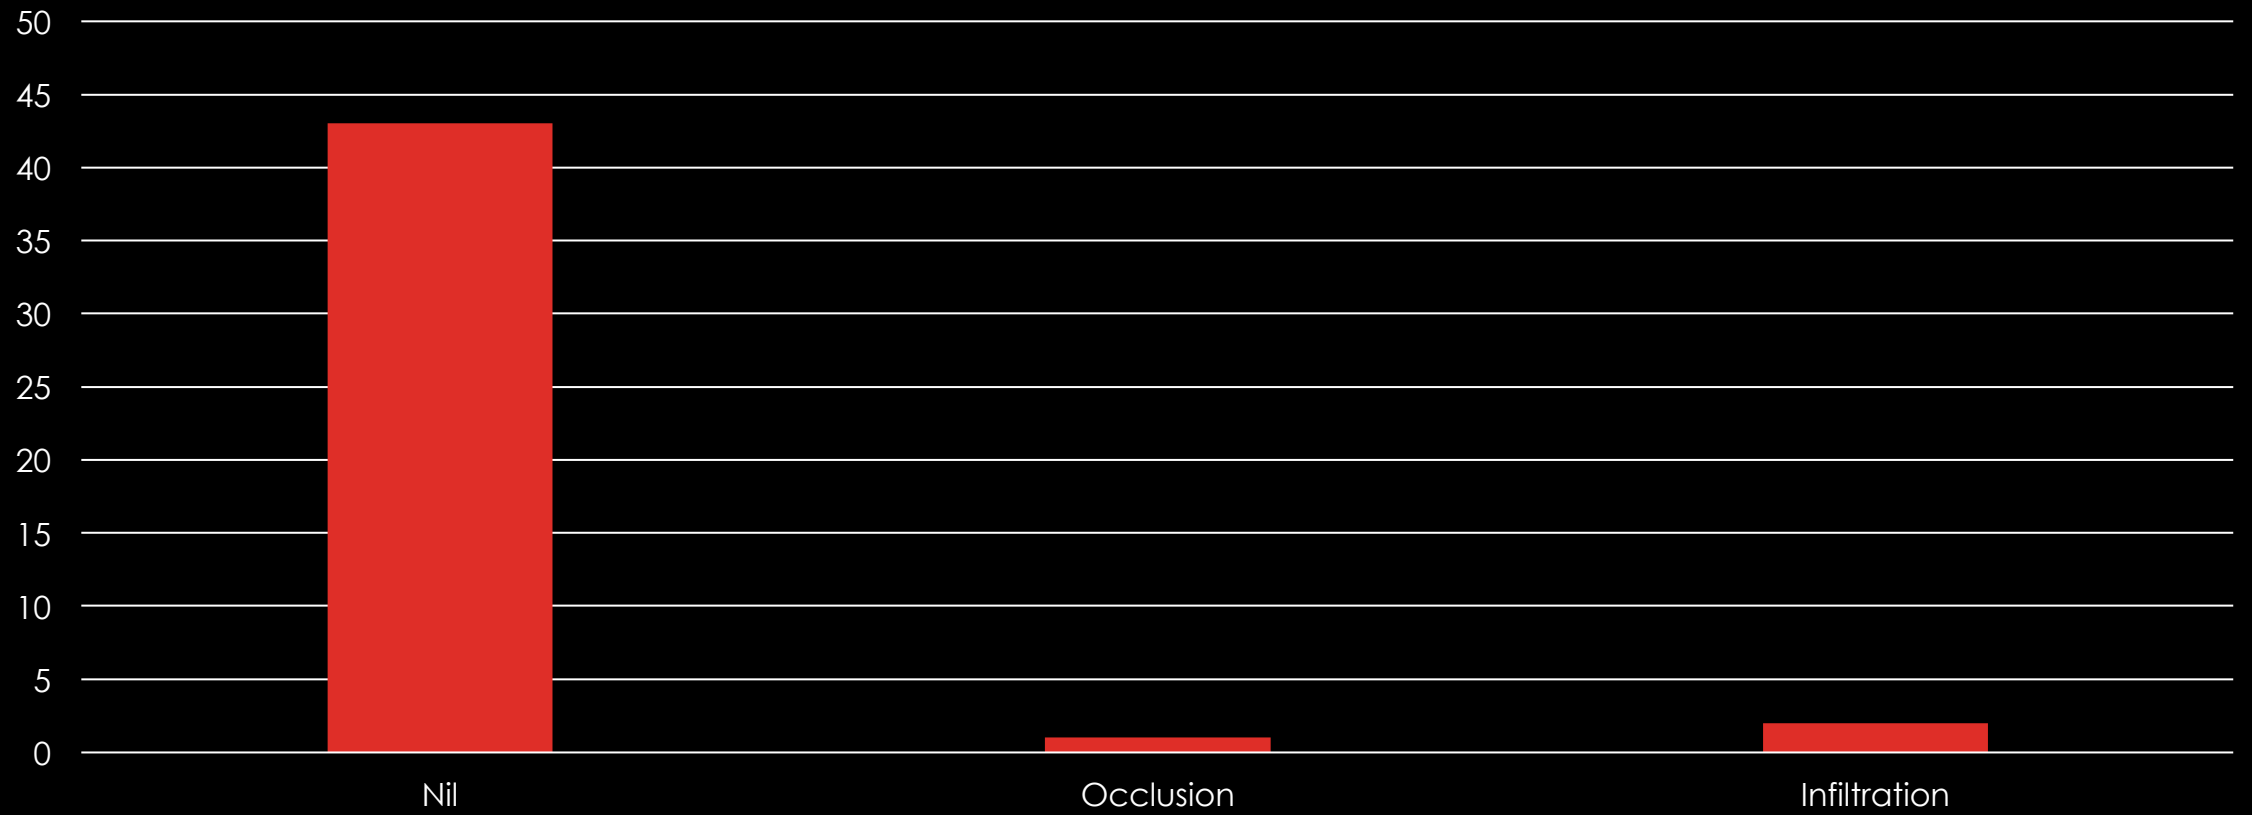

INDICATIONS FOR INSERTION

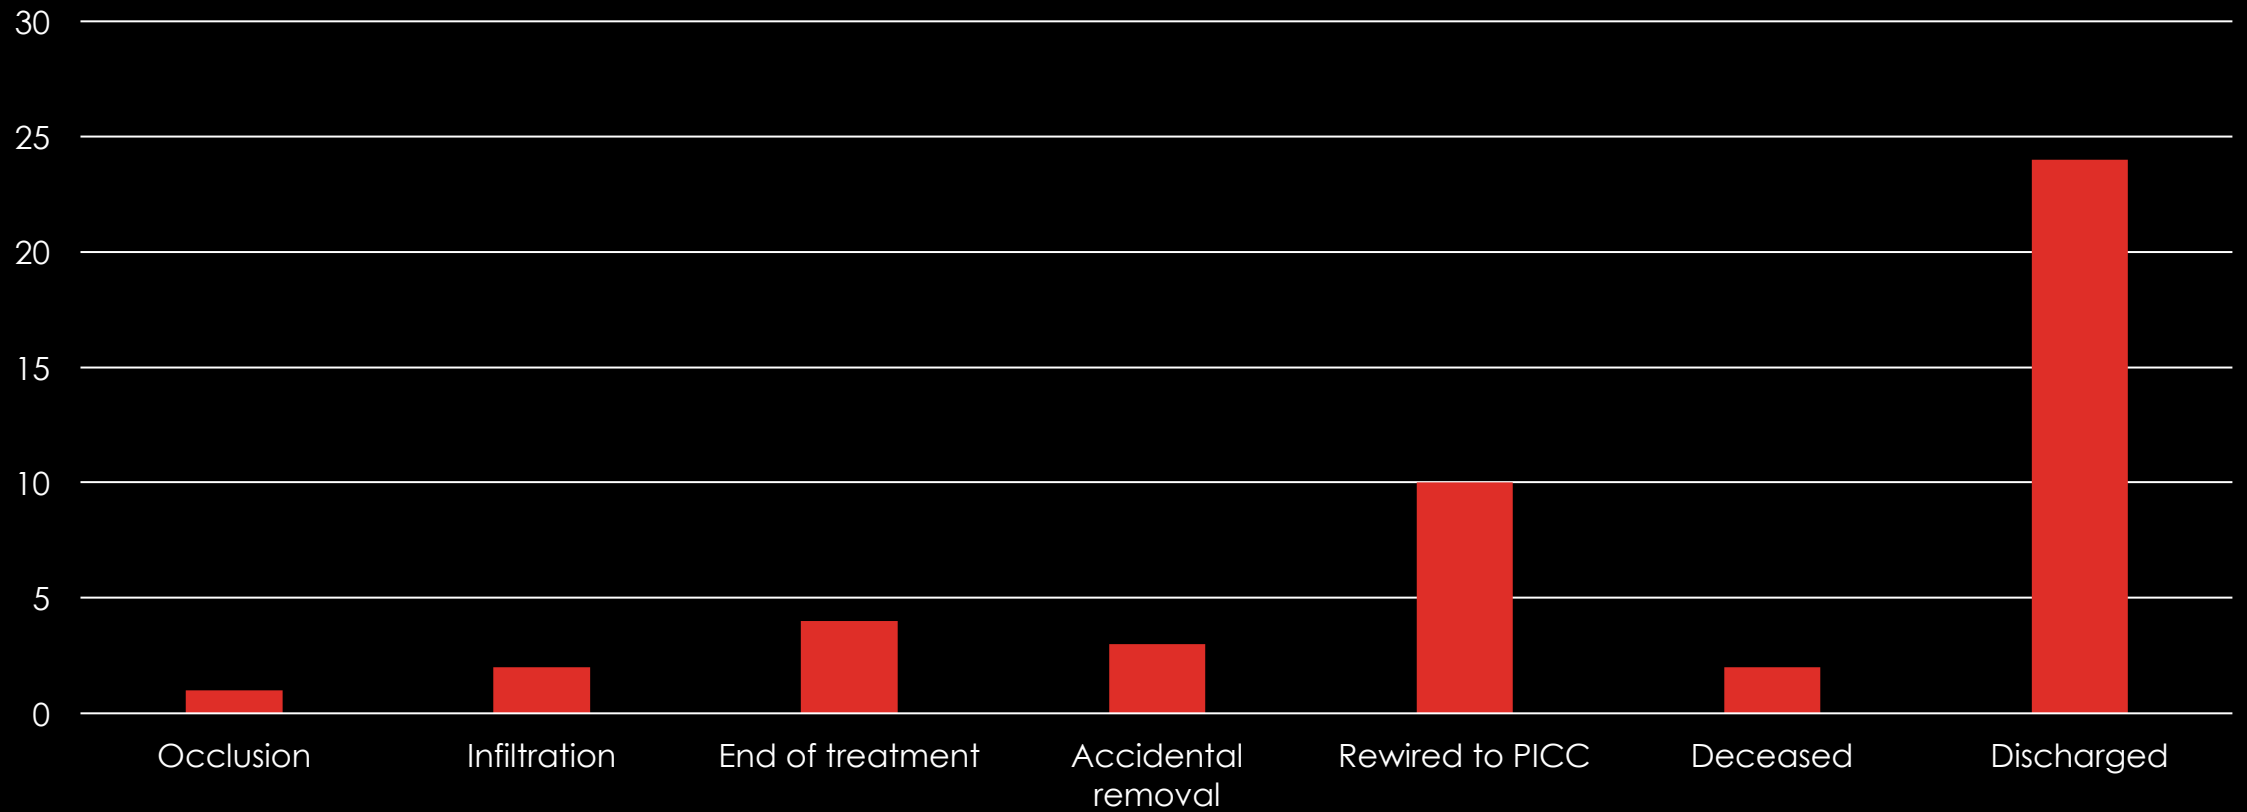

THERAPIES ADMINISTERED

ADVERSE EVENTS

REASON FOR REMOVAL

COST VS PATIENT EXPERIENCE

A man with dark hair, wearing a white t-shirt, is leaning out of a window with a white frame. He has his mouth wide open as if shouting or crying. The background behind him is dark. Overlaid on the right side of the image is the text "Not Happy Jan!" in a large, yellow, stylized font with a black outline. The text is arranged in three lines: "Not" on the top line, "Happy" on the middle line, and "Jan!" on the bottom line.

**"Not
Happy
Jan!"**

- Not for everyone
- Improved patient satisfaction & experience
- Endorsed

THANK YOU
